# TELEKOM CLOUD SERVER
A RELIABLE SERVER INFRASTRUCTURE

VIRTUAL SERVER

A virtual server is a replacement for a conventional server running OS Windows or Linux, hosted by Telekom. The TelekomCloud virtual server, however, allows you to dynamically allocate the required computing resources (CPU, RAM, HDD) and to create and manage servers according to your current needs through a simple web interface. TelekomCloud offers you a secure connection to IT resources via Internet, VPN, or a private data network.

FLEXIBILITY
Instant server set-up a with tailored set of parameters.

SECURE ENVIRONMENT
Telekom data centres built for continuous operation, located in Slovakia.

LOWER COSTS
Fully-featured replacement for typical corporate server from €61/month.

TECHNICAL DETAILS

USED TECHNOLOGIES
- IBM blade servers, Hitachi high-end disk arrays, Cisco LAN and SAN
- VMware virtualization
- Citrix cloud orchestration platform and self-service interface for customers

RELIABLE OPERATION
- Infrastructure located in Slovak Telekom data centres
- Robust telecommunications network fully owned by Slovak Telekom with protection against attacks
- 99.9% SLA availability of virtual servers and continuous running of applications

EASY SET-UP AND MODIFICATIONS
- Preconfigured or custom set-up
- Select from two different data centres
- Configuration setup, console access, and server use through the TelekomCloud portal
- Buying additional or reducing already allocated CPU and RAM computing resources with an hourly rate
- 3 types of storage for various performance needs: SATA, SAS, SSD

OPERATING SYSTEM
- OS Windows Server 2008, 2012, 2012 R2
- Linux Ubuntu, CentOS, Debian
- Option to upload customer's own image of other OS distributions

CONNECTIVITY AND SECURITY
- SW firewall, load-balancing and NAT included
- Shared Internet connection
- Full-scale support for private data networks
- Unlimited amount of data transferred
- ISO 27001 Security, ISO 27018 Data Privacy in Cloud, and ISO 27018 Business Continuity Management Certificates

ADDITIONAL PRODUCTS AND SERVICES
- Fortinet VDOM firewall
- Direct Line connection between any Telekom data centre and a virtual server
- Creating a virtual server custom template
- Arbor Networks anti-DDoS protection
- Analytical and implementation professional services
- Guaranteed dedicated Internet connection
- Licensing of Microsoft products on a monthly basis (Windows, SQL, Exchange)
