## **Digital signature validation**

This document should help Suppliers to set signature properties of Slovak Telekom purchase orders

I. Signature part (last page) of the PO should look like this:

All Annexes to this order shall form an integral part of this order. In the event of discrepancies between the actual text of this order and any of its Annexes, the provisions of the actual text of this order shall prevail. If this purchase order is sent electronically via email, electronic seal of Slovak Telekom shall be attached to the email.

ST signature

II. Double click on the signature – if ste status is unknown, then click on "Signature properties…"

III. Click on "Show Signer's Certificate..."

Certificate Details	
Subject: Slovak Telekom < ERP_PO_Procurement@telekom.sk>	
Issuer: CA Disig R2I3 Certification Service	
Usage: Digital Signature, Encrypt Keys, Encrypt Document	
Expiration: 26.11.2021 12:48:27	
Trust	
A certificate used to sign a document must either be designated as a trust anchor or chain up to a trust anchor in order for signature validation to succeed. Revocation checking is not performed on or above a trust anchor.  Use this certificate as a trusted root If signature validation succeeds, trust this certificate for:	
Certified documents Unamic content Imbedded high privilege JavaScript Privileged system operations (networking, printing, file access, etc.)	
Help OK Cancel	

## Again, click "OK" VI.

## VII. Finish the signature validation by clicking on "Validate Signature"
